

Underground fittings

For all rigid pipe systems, various fittings are available for underground laying. As standard, T-pieces, bends and reductions are produced. Naturally, even special fittings can be manufactured according to your project specifications.

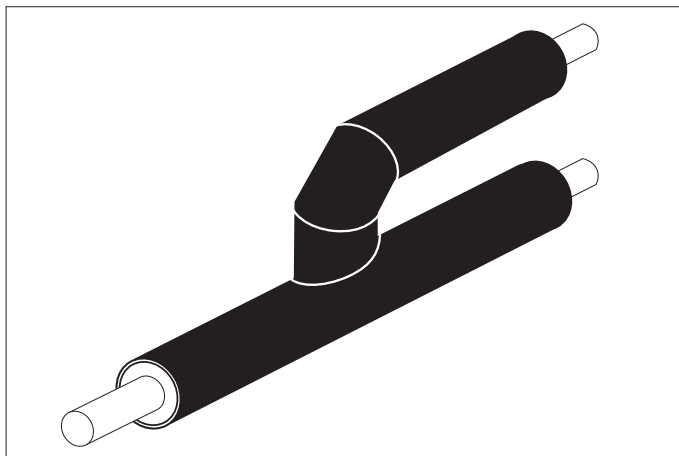

T-pieces

T-piece with straight loss.

T-piece with 45° loss.

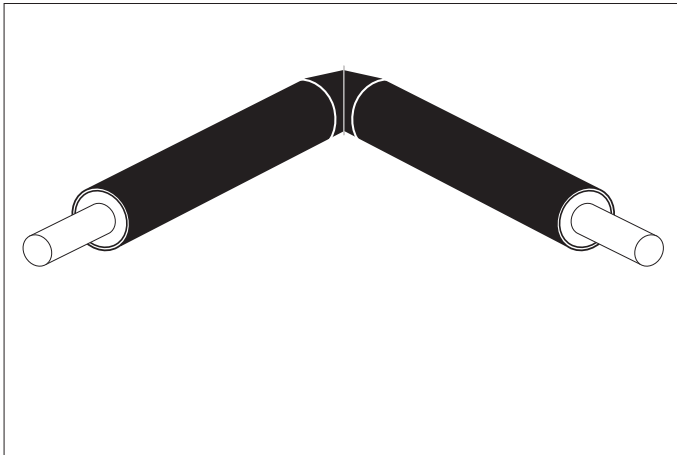

T-piece with parallel loss.

Underground fittings

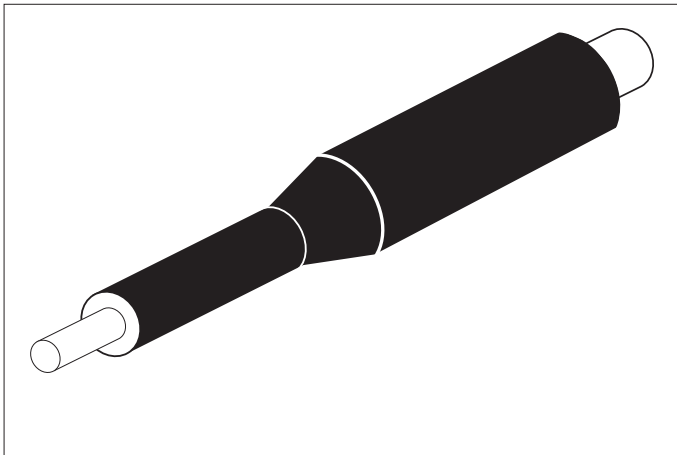

For all rigid pipe systems, various fittings are available for underground laying. As standard, T-pieces, bends and reductions are produced. Naturally, even special fittings can be manufactured according to your project specifications.

Bends

Equal sided and unequal sided bends with different inclination angles.

Reductions

Standard reduction reduced by one size.
