

## EHS - Brugg Pipes Environmental Policy

Environment – Health – Safety

BRUGG Pipes is committed to sustainable development and bases its EHS environmental policy on respect for people and their environment while staying consistent with good economic performance.

Based on the company objectives, vision and the management handbook of the BRUGG Group, the aim is to reduce EHS risks to a minimum and to meet the expectations of our employees, customers and other stakeholders in the field of EHS.

To this end, our management system is based on the ISO 9001, ISO 45001 and ISO 14001 standards

PIONEERS IN INFRASTRUCTURE

### COMMITMENT

**That is why we are committed to:**

- Acting responsibly and sustainably to continuously optimise the safety and health of people and the environment
- Using our resources sparingly and minimising our environmental impact where possible
- An appropriate information policy towards our employees
- Continuously improving our efforts to develop in the field of EHS
- Complying with legal and statutory requirements
- Respecting the idea of sustainability
- Conscious use of resources and a reduction in environmentally harmful emissions and the waste we create
- Involving and informing all relevant and interested partners, such as customers, suppliers and authorities regarding our efforts to improve environmental protection as well as occupational health and safety
